GSM RACK MOUNT SOLUTION GV-GSM-RM

The GV-GSM-RM is designed for advanced wireless monitoring, control and remote access.

With the GV-GSM-RM remote installations can be monitored and be wireless controlled by personnel over the GSM network. The unit can be configured to send text messages to a selected group of people when an input is activated or when a threshold value for an analogue input has been reached. Output signals can also be activated by the System Operator by sending text messages to the unit.

FEATURES

- Advanced wireless monitoring
- Controlled over the GSM network
- All inputs and outputs can be activated by sending a individual text message
- Quad Band (850/900/1800/1900 Mhz)
- C € EU EMC Directive 2004/108/EU
